Seek Simple Viewer
Quick Start Guide

The Seek Simple Viewer is an application written by Seek Thermal using the Seek Thermal SDKs with OpenGL primitives. Seek Simple Viewer is a robust example of what is capable using the Seek Thermal SDKs. In addition, the Seek Simple Viewer can be used to quickly image, test, and adjust a Seek Thermal OEM Camera Starter-Kit.

Download the Seek Simple Viewer Installer

1) Open any web browser and type https://developer.thermal.com/ and in the middle of the page you will see the Seek Thermal Sample Viewer download icon.

Note: If there is not already a Seek's Developers Portal account in place, a new account will need to be registered.

2) Download the installer:

If using this OS	Download
Windows 64-bit OS	*SeekSimpleViewer_x64.msi*
Linux AMD 64-bit OS	*SeekSimpleViewer_amd64.deb*

Install Seek Thermal Simple Viewer

3) Double click on the installer and install the Seek Simple Viewer.

Display Live Video in the Simple Viewer

4) Go to the Windows Start menu and navigate to select the Seek Simple Viewer application.
5) Plug the Seek OEM Camera Starter-Kit into a USB port on the PC, if this is not done already.
6) Click on camera Serial Number displayed in the 'Cameras:' table section in the upper left corner and select the Seek Camera Sensor, then push the **Start** button in the Camera Control section to start displaying live video, querying, and setting parameters in the Seek Thermal SDK.
